Dorstab BC150

Characteristics

A liquid PVC stabilizer containing Barium and Cadmium.

Physical Form

Liquid

Density

 0.93 gr/cm^3

Refractive index

1.456

Application

The liquid stabilizer DORSTAB BC150 is compatible with plasticizers.

It is general purpose complex stabilizer of Ba- Cd salts which will give an excellent stability to all plastified PVC made with it.

DORSTAB BC150 is recommended for use in the production of flexible product by either a calendaring, extrusion or injection process.
