DORSTAB KZ

Characteristics

A non-toxic kicker stabilizer useful in foaming PVC.

Physical form: clear yellow, slightly viscous liquid.

Density $1 \pm 0.02 \text{ gr/cm}^3$

Refractive index 1.450

Application

DORSTAB KZ is an absolute non-toxic kicker stabilizer containing potassium and Zinc metals.

It protects PVC articles from Sulphure staining, facilitates the decomposition of blowing agent at 180°c , and thus a very fine homogenous cell structure is obtained. Its strong activity permits the use of DORSTAB KZ in rather short baking spreading machines.

It is recommended to mix DORSTAB KZ with plasticizer during plastisol preparation.
